Valencia, Spain

PROFESSIONAL SUMMARY

Full stack software engineer with 7+ years of experience, specialised in designing robust, maintainable backends. I build REST APIs following Clean Architecture, DDD and CQRS, integrate distributed messaging and data systems, and automate deployments on Linux and cloud (GCP/AWS). I pair a solid systems-administration background with end-to-end product development.

EXPERIENCE

Research & Development Engineer

ITI — Instituto Tecnológico de Informática · Valencia

2023 — present

- Backend development of the internal iti-moar platform in Python (FastAPI) applying Clean Architecture, DDD and CQRS.
- Integration of messaging and polyglot persistence with Kafka, MongoDB, Redis and Elasticsearch.
- Frontend development with Vue 3 and Nuxt, consuming secure APIs with JWT/OAuth2.0.
- Maintenance and evolution of custom Odoo modules (CRM, payroll and analytics).

FastAPI · DDD · CQRS · Kafka · Vue 3 · Odoo

Junior Software Developer / TSR

Webhelp · Google Project · Barcelona

2020 — 2023

- Development and support of internal applications and tools on Google Cloud and Google Workspace.
- Data and Google API integration; service architecture on GCloud and Apigee.
- Automation scripting, code analysis and bug reporting.
- Direct technical communication with the client.

GCP · Apigee · APIs · Bash

Web Developer

SNIK Comunicaciones · Remote

2020

- Design, development and maintenance of websites and web applications for a range of clients.

JavaScript · PHP · Web

IT Technician

Altura Town Hall · Altura

2019 — 2020

- User management in Active Directory and cloud infrastructure on AWS.
- Implementation of internal web tools: vacation management and ticketing system.

AWS · Active Directory · IT

Freelance Web Developer

Self-employed · Remote

2018 — 2019

- End-to-end design, development and deployment of applications.
- UI in Figma/Photoshop, frontend in React/Vanilla, backend in FastAPI/Express and data in Mongo/SQL on GCP/AWS.

React · FastAPI · MongoDB · GCP

SELECTED PROJECTS

iti-moar Platform

Internal research platform on FastAPI with Clean Architecture, DDD and CQRS; Kafka messaging and polyglot persistence (Mongo, Redis, Elasticsearch).

FastAPI · DDD · Kafka

Custom Odoo Modules

CRM, payroll and analytics modules integrated with the institute's internal workflows.

Odoo · Python · PostgreSQL

GCloud Internal Tools

API integration, scripting and data architecture on Google Cloud and Apigee.

GCP · Apigee · Automation

Personal portfolio — emelcd.github.io

Site in React + Vite + TypeScript with Tailwind and shadcn/ui; bilingual, with themes and accents. Open source.

React · Vite · TypeScript

TECH STACK

Backend

Python · FastAPI · Flask · Node · Express
OAuth2

Frontend

Vue 3 · Nuxt · React · Angular · Tailwind
TypeScript

Data & Infra

Kafka · MongoDB · Redis · Elasticsearch
Docker · SQL

Linux & Cloud

Linux · GCP · AWS · Bash · GitLab CI
Apigee

METHODOLOGIES

Clean Architecture · DDD · CQRS · REST
TDD · CI/CD · Agile / Scrum · Code Review

CERTIFICATIONS

Developing APIs in GCP Apigee

Google · 2026

Google IT Automation with Python

Google · 2022

EDUCATION

Higher Certificate in Systems Administration

UNED · Buitrago · 2021

Bachelor's in Psychology

University of Valencia · 2016

STRENGTHS

Technical communication · Problem solving
Autonomy · Teamwork · Continuous learning
